-  Dangerous cargo handling

## 2. Scope of services

### 2.2. Shipping Agency and Brokering

- ❖ Initiated with the development of the shipping activities, this field has grown and become a considerable VietNga' business activity. With offices situated in HaiPhong, HoChiMinh, Danang, Quynhon the large ports of Vietnam, we have full ability to work as agency for every shipping liner. This capability has been proved by our services provided to many vessels, both domestic and overseas.
- ❖ Besides, with our experience gathered many years working in multimodal transport, especially shipping activities, we have collected an adequate information system on demand and supply situation, cargoes and ship owners in regional shipping market. This premise enables us to do business in shipping brokerage. With all above mentioned superiorities, regardless of who you are, shipping carriers or goods owners, co-operating with VietNga is the best way to find necessary partners in ocean transportation.

## 3. Inland Trucking Services

### 3.1. About Inland Trucking

- ❖ Door to Door : VietNga inland trucking service is no stand alone service but part of our comprehensive supply chain solutions. It is an additional service to close the gaps between ports, warehouses and the final destination. We truck your freight as part of a multi modal solution or door to door solution. We offer this service not only in all the parts of VietNam , but come to some countries as Laos, Thailand ...
- ❖ Inland Trucking and Transportation at Low Costs : As for most of our services, our local cost advantage applies especially for trucking and inland transportation. We work with others trucking companies on a local level. Through the years we build good relationships of trust with these companies and their truck drivers. Therefore we are able to offer you trustworthy service at lowest local prices.
- ❖ VietNga integrated freight trucking solutions deliver reliable and economical results for our customers. Our truck delivery service is focused on basic freight shipping needs of our commercial customers. This service can be used to ship your goods within VietNam or to connect to our international network via our oversea agent networks in the world. In addition, VietNga provides a seamless road feeder service for FTL (full-truck-load) and dedicated expedited deliveries.
- ❖ VietNga also offers a complete range of container logistic custody, dispositioning, inland transportation, maintenance and repairs, leasing arrangement.

## 3. Inland Trucking Services

### 3.2. Transportation of Cargos LCL

**We own various trucks of 1.25T, 1.5T, 2.5T, 3.5T, 4T, 5T, 6T, 7T load transportation services.**

- ❖ Even small-scale cargos may be quite significant and important, but renting an entire container or wagon for transportation is, obviously, unreasonable. In this case it is more efficient to make use of occasional shipments or to select a vehicle heading to your cargo's point of destination as soon as possible. We will assist you in transporting of small lots of cargo at the price which corresponds to its volume and weight, notably:
  - Choosing the space for your cargo in an “mixed consignment” container or in a vehicle for less than container load or small lot cargo transportation
  - Supervising the positioning and fixation of the cargo in the vehicle/container
  - Ensuring that your cargo is separated from all other cargo, which could possible damage your goods or reduce their quality
  - Providing quick loading, unloading and delivery of LCL cargo
  - Informing you about the cargo's location and condition on your demand

## 3. Inland Trucking Services

### 3.3. Transportation of Cargoes FCL Container

- ❖ VietNga offers whole container transport to and from its ports of call in VIETNAM, as well as pre-carriage from around the world. Generally, 20 and 40 feet containers of various types are used:
  - Dry containers for transporting various dry goods (personal effects, industrial products and so on)
  - Temperature controlled containers for transport of products such as foodstuffs, fish products, raw material and other perishable cargo
  - Open units for transport of large and oversized units

## 3. Inland Trucking Services

### 3.4. Transportation of oversized, heavy cargoes / bulk cargoes

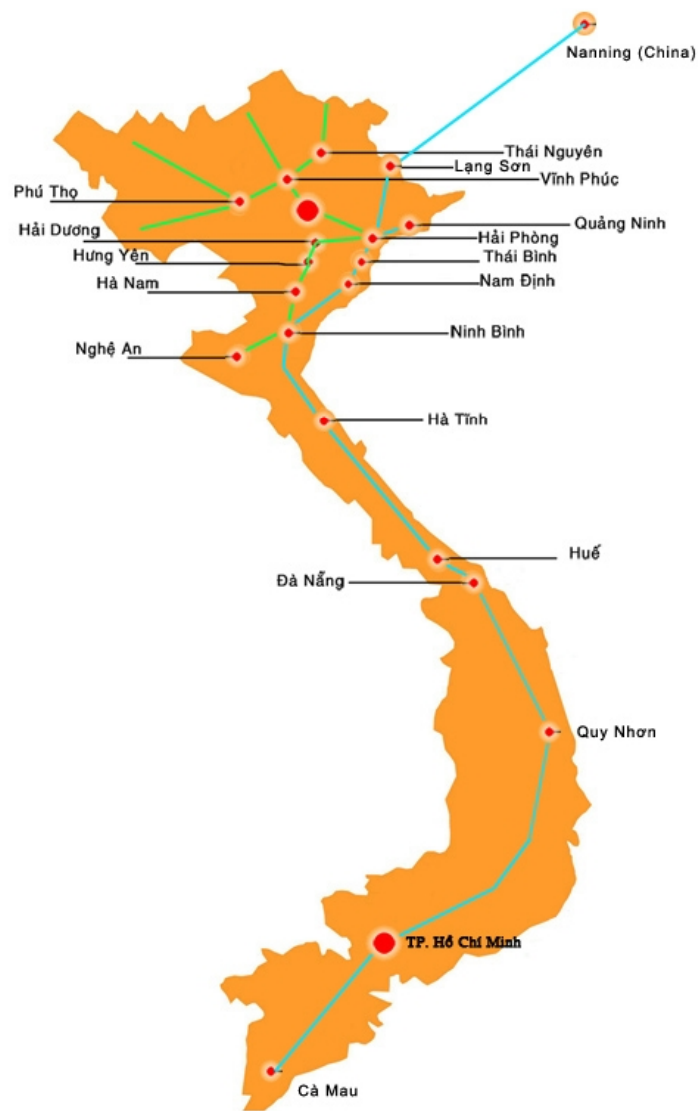

- ❖ Our flexible and consistent service quality provides supply chain solutions and complete global and domestic transportation services for all your shipments. As a pioneer in container transport with its own trucking fleet, our company has a full scale system which uses specialized tractors and trailers ( tacphooc for over weight – over size cargo and bulk cargo ) , trucking services are available to all part of Vietnam for any type of cargo, no matter how large in scales or small in lot. Use of specially equipped vehicles operated by special licensed drivers has given the company a solid reputation for the delivery to any reception area, specially to the border gate
